

## OUTDOOR SPACES - NEW IN OUR PROJECT SHOP

The outdoors as a stage – for encounters, communication and brand presentation.

With our new outdoor solutions, we are expanding the possibilities for bringing brands to life outdoors: with lecture areas, chill-out areas or as a mobile showroom.

You can now find a variety of pre-built outdoor solutions in our project shop that are flexible in use and available to rent at any time. Whether static or mobile, at the exhibition grounds or in the city – there is something for every project.

All solutions come with informative marketing documents available to download – for quick and easy planning.

### 1. BRAND COMMUNICATION ON THE MOVE

Our mobile advertising scooter delivers your message right into the heart of the city.

A compact vehicle with a customized billboard that creates visibility where people are on the move.

Flexible, eye-catching and made to move to the rhythm of the city – perfect for all dynamic brands.

### 2. GREEN SPACES WITH IMPACT

This modular installation transforms courtyards, public spaces and entrance areas into lively meeting points.

Beach atmosphere and seating areas made from wooden planks and green plants provide the perfect setting for lively conversations. This is where brands are showcased and content is communicated. A place that combines relaxation, communication and brand identity.

### 3. WHERE YOUR BRAND MEETS THE CITY

Our showroom containers with generous glass fronts offer visibility and presence at eye level.

Whether as a pop-up store, product stage, or exhibition unit, our mobile modules create space for encounters, interaction, and impact.

Modular, transportable, and ready to bring brands to life in public spaces.

### 4. TENTSCAPES

Our tented landscapes create fluid transitions between architecture and nature.

Designed to connect indoor and outdoor spaces, they offer shelter, atmosphere and a clear framework for your brand.
